

Basketball Addition

**Equipment: One Basketball Goal
Two Basketballs
16 Polyspots – 4 each of 4 different colors**

Object of the Game: To score a greater number of points than the other team.

Directions:

***Divide the class into 2 teams and assign each team 2 colors of polyspots.**

***Spread all of the polyspots out in different places in front of the basketball goal. Each team has been assigned 2 colors. One color will be for “2 point shots” and the other will be for “3 point shots”.**

***Have each team form a line at the opposite end of the area (gym).**

***One player from each team runs to a spot of their choice and shoots the ball. If they make it in the goal, they score 2 or 3 points depending on which color they shot from. If they miss the shot, they score 0 points. The player who shot then retrieves their own ball and runs it back to the next person in line.**

***Each team is responsible for adding up their score along with the teacher.**
